## **Diving in Bali**

Tulamben - is the most famous diving area in Bali with its wreck & black sand bottom. The USS Liberty vessel is situated just 35 mts. off shore, 395 feet (120 m) long, laying at 7 -30 meters depth. It is completely encrusted with gorgonians, anemone, sponge - corals and full of all sorts of marine life. Tulamben's drop-off is a very popular dive. The main wall is formed by hard and soft corals on top of lava spars from the Volcano. Rich in reef fish, invertebrates and pelagics. There is also a very large gorgonian to see at 30 meters.

Nusa Penida - island has everything a diver could want to see, including Sharks, sea turtles, mola-mola (Sunfish), Rays, Grouper, hard & soft corals some up to 5 meters long and healthy reef fish. It is fortunately an excellent site all years round with great visibility. The current here can be wild and almost all dives here turn into a drift, currents can reach a speed of up to 3 knots. Access here is by Outriggers scuba dive boat with a sundeck. The trip to the dive site take around 50 mins. from Padang Bay.

LivingSeas Team – Known to be anally safe underwater, and crazy on land. Knows how to party and have fun after a diving day. Trained under the most rigorous regime to react to situations underwater.
